Shot Timer MK1 Parts Inventory

Huckleberry Innovations LLC | BOM firmware v1.7.5, enclosure v6

Date: _____ Counted by: _____ Units to build: _____

Ref	Part	Per timer	Pack qty	On hand	Need	Short	Order (packs)	Ordered / date	Notes
U1	Arduino Nano (ATmega328P) USB-C	1	3						
U2	0.96in SSD1306 OLED 128x64 I2C	1	1						
U3	INA219 current sensor (0.1 ohm shunt)	1	3						
PCB1	ElectroCookie solderable protoboard	1	5						
MK1	Clip-on lavalier microphone 3.5mm TRRS	1	1						
J1	TRRS 3.5mm breakout board	1	6						
BT1	9V USB-C rechargeable lithium battery	1	5						
BT1-CLIP	9V battery clip with leads	1	10						
SW1	Latching power switch blue-lit guarded	1	6						
SW2	16mm push button green (START)	1	5						
SW3	16mm push button red (STOP)	1	5						
LS1	Buzzer	1	5						
D1	White LED panel-mount	1	5						
CONN	2-pin wire connector/plug	3	30						
R1	10k 1% resistor	1	25						
R2a/R5	2.2k 1% resistor	2	25						
R2b	4.7k 1% resistor	1	25						
R3	100k 1% resistor	1	25						
R4a	22k 1% resistor	1	25						
R4b	68k 1% resistor	1	25						
C1	10uF electrolytic capacitor	1	10						
ENC	3D-printed PLA+ enclosure (top + bottom)	1	1						
HW1	M2x4 socket head screw	22	100						
HW2	M2 flat washer	22	500						
CLIP	Belt clip	1	2						
	Hookup wire								
	Solder								
	Heat shrink								
	PLA+ filament								

Notes / reorder list

Need = Per timer x units to build. Short = Need - On hand.

Rows from hardware/BOM.csv (github.com/jfkure/shot-timer-mk1). Hardware CERN-OHL-S-2.0, docs CC BY-SA 4.0.

CONN comes in pairs. Battery: 9V USB-C rechargeable lithium only.
